

Nathalie LECOCQ

What is Carbon footprint ?  
How long does it exist ?  
Who is the responsible for this indicator ?

For whom?  
For what?

Calculate your own indicator on a special website.  
See the differences between among your native countries.

What is the average value in Europe and in the USA , and in the rest of the world?

Elaborate the exhaustive balance of all the activities related to the intensive programme ranging from the partners' departure to their return to their native countries during the 2 weeks.

Make assessments for the plane flights, bus, car trips, use of computers, meals, use of premises, etc...

Calculate as precisely as possible the quantity of equivalent CO<sub>2</sub> released by all the activities in the programme.
